

## Pinpoint Dedicated Internet Access (DIA)

### ► **Guaranteed access, speed and performance make Pinpoint's DIA the ideal foundation for your VPN.**

At the heart of Pinpoint's **Dedicated Internet Access** service are multiple connections to two separate Tier 1 IP backbones at speeds up to 10Gbps. As a global leader in size, client base and interconnection agreements, Pinpoint can guarantee rates of availability, transit delay and packet delivery anywhere in the world through service level agreements that include monetary penalties for non-compliance.

Using Pinpoint's DIA, your traffic is transmitted at the highest rates currently available, with a packet loss rate approaching 0%. BGP4 Re-route is enabled in every core router in the network to ensure a faster recovery time over IP based optical networks.

Pinpoint's DIA service is constantly monitored, and customers have access to statistics regarding their own Internet speed and performance. The service is scalable, with network point-to-point access speeds ranging from 128 Kbps to 10 Gigabit Ethernet.

### ► **Benefits**

- **GUARANTEED QUALITY.**

For business-critical VPN applications, Pinpoint guarantees availability, packet delivery and transit delay.

- **PRICING FLEXIBILITY.**
